

## RED-LIGHT-RUNNING CRASHES

INTERSECTION CRASH TYPE	Crashes	MOST SEVERE OUTCOME IN CRASH				
		Fatal Crash	Injury Crash			PDO Crash
			A	B	C	
Related to intersection	81,377	227	1,523	4,974	13,833	60,820
In intersection	37,424	171	970	3,024	7,388	25,871
With traffic control signal	18,384	70	445	1,546	3,928	12,395
With hazardous action	5,031	32	189	625	1,349	2,836

“Related to intersection” captures crashes that were related to or within 150 feet of an intersection.

“In intersection” captures crashes within all types of intersections.

“With traffic control signal” captures crashes within the intersection and with a traffic control signal present.

“With hazardous action” captures crashes within the intersection, with a traffic control signal, and with a hazardous action cited as “disregard of traffic control.” Information pertaining to red-light-running in the following tables is derived from this subset of **5,031** crashes.
