

UPPER PENINSULA DEATH & INJURY FOR CRASH INVOLVED OCCUPANTS

The majority of occupants involved in crashes are not injured (87.2%). About 66% of those who are injured receive only possible (C) injuries.

Crashes involving drinking tend to be more serious than non-drinking crashes. The percentage of fatalities is five times higher, and the most serious injury level (A) in had-been-drinking crashes is about three and a half times higher than in all crashes.
